Fancy Leaved *Caladiums*

Magnificent in their own right, they also make a perfect background for other flowering plants. They grow quickly and easily in pots, thrive on light, loamy soil. If you'd rather set them up in a favorite China Bowl, use Max Schling's Bulb Fiber that needs no drainage. Outdoors, they'll continue to grow lavishly through the whole summer. You get the advantage of the low quantity price for club members and are assured of delivery even though our supply is limited. We will split the order as you direct. The pips, in individual lots, will be sent on the dates specified—to any address, or different addresses, according to your instructions. By this "shipment-at-intervals" plan you can have a fresh container of Lily-of-the-Valley blooming right through the season.

the ideal gift idea For that special gift what could be more thoughtful and original — than a hand-some container planted with choice imported Lily-of-the-Valley pips? Here's the perfect remembrance for Christmas, New Years, Valentine's Day, Mother's Day, birthdays and anniversaries.

pips will bloom in a few short weeks All pips delivered from September to December 31st are last season's harvest, specially treated for forced blooming in 18 to 21 days. Pips shipped after December 31st, will be newly harvested and require 25 to 30 days to bring them to full bloom. As the season progresses, this growing period is gradually reduced to 21 to 25 days. Consult the table of blooming dates on the enclosed order envelope to guide you in ordering.

variety of attractive containers We have selected a large variety of attractive, graceful bowls as containers for these pips. Of course you can order the pips alone for planting in your own container if you wish. Or successive shipments can be planted in the original container after the first planting has ceased blooming. In addition to the containers illustrated, we have a full line of oblong, square, oval and round brass containers, in excellent taste. Available, all planted, from \$12 to \$25.

After the blooming period is over, plant the pips outdoors in spring and they will bloom all over again the following year.
